Compliance summary (attachment for counsel), for counsel preparing an affidavit of service or a default motion. Not a court-filed exhibit. For counsel's review. Does not determine compliance. Not legal advice.

Compliance summary (attachment for counsel)

People v Unknown Parties in Ownership and/or Control of Digital Wallet Addresses (demo replay)

Supreme Court of the State of New York, Queens County, IAS Part 24 · Index No. 700647/2025 · Hon. Karen Lin · order entered 2025-06-11 (source: decision-and-pleadings-2025.pdf page 6)

> Replay of a public New York Attorney General case; the author is not a party to it. The order names two TRON wallets; this tool writes only to EVM chains, so in this replay they are served on Sepolia stand-ins. Service in this summary was made on Sepolia (chainId 11155111) to **stand-in wallets**; nothing was sent to the defendants' real wallets, which are only read. This is a summary for counsel to review, not a court-filed exhibit and not a compliance determination; the chain records what was sent and when, not that anyone read it, and not when a paper was filed with the court.

B. Order conditions and performance record

Conditions were pre-extracted from the order (p.6) and confirmed by the author (demo). Status comes from `ConditionFulfilled` events in the registry: "Evidence linked" means the handler linked a record to the condition, not that the condition is met. Conditions with no evidence linked are marked in red.

The January 2025 notices served the order to show cause (motion papers) before the June 2025 order. The July 30, 2025 items are unattributed NFTs titled "Service of NY OAG Summons and Complaint…" (sender not matched to court records; contract name on-chain: SoulBoundTest). They are not linked to any condition.

C. Deadlines and activity after service

Item	Value	Basis
Service deadline (original case)	2025-10-09	entry 2025-06-11 + 120 days (CPLR 306-b extension in the order)
Service deadline (this replay, on-chain)	2027-02-22	case opened + 120 days; the registry requires a future deadline
Declared affidavit filing date	2026-10-25	entered by the filer; the chain cannot prove the court filing date
Response deadline (estimate)	**2026-11-24** (New York date)	CPLR 320(a) — declared filing date + 30 days (status: excerpt-verified). Estimate. Counting rules (GCL §20, §25-a weekends/holidays) not applied — counsel must confirm the last day. Meaningful only if service was valid under the order.
Caveat	**Estimate. Counting rules (GCL §20, §25-a weekends/holidays) not applied — counsel must confirm the last day. Meaningful only if service was valid under the order.**	
Activity snapshot	Shown via local replay; pending on Sepolia until 2026-11-24 (New York date) — the registry rejects a snapshot before the response deadline. Computed root (not yet anchored): `0x4a985a35…27689404`. Sepolia time cannot be advanced. The registry rejects a declaredFiledAt earlier than case opening (FiledAtBeforeOpen) and any snapshot before the response deadline (ResponsePeriodOpen), so this step is pending on-chain. The snapshot step is shown from the local anvil replay.	

Context only, not evidence of notice. Wallet transactions per month after the original order (Jun 2025 – fetch date), including incoming airdrops. Activity does not show that anyone saw the notice.
